HKS Architects

Inc.

General Contractor

Manhattan Construction

One of the most exciting and high profile projects in recent years was the Cowboy Stadium in Arlington. What an opportunity for Marek to really showcase its craftsmanship and commitment to quality. In addition to housing this world famous team, the facility is also used for large concerts, high school football, NCAA bowl games, and a variety of other major events. Designed by HKS Architects, Inc. the multimillion dollar project was developed by Manhattan Construction. The stadium is 2.3 million square feet in size. The stadium is the largest enclosed stadium in the NFL and the largest domed structure in the world. Marek craftsmen installed the

drywall, ceilings and metal stud framing.
