
IN ADVANCEMENT.

TECHNOLOGY

As part of our efforts to foster industry-wide advancements, MAREK is committed not only to being early adopters of technology innovations but also to developing new ways to improve efficiency and service. We work with software developers and construction industry experts to establish new processes and practices in our industry. Our efforts toward advancement include beta testing and adopting digital estimating software, employing innovative field communications, implementing paperless payroll system and developing lean and sustainable construction practices.

BIM AT MAREK

MAREK has been utilizing Building Information Modeling (BIM) in-house and with customers since the beginning of 2010. Our early adoption of BIM is just one more example of our commitment to driving industry improvement through the use of technology.
