
WEEKLY TOOLBOX TALK: BECAUSE WE CARE

Posted by Jorge Vazquez on November 28, 2018

MAREK

Volume XXIX

Number 48

December 3, 2018

At MAREK we care for our employees. Safety is a major role in everybody's life and doing the **right thing for the right reason** is the key to our success. We, as a group of employees, must focus on safety and prevention by practicing problem identification and problem solving. To work at MAREK you must care about safety by paying attention to and avoiding hazards.

MAREK takes a lot of effort in making sure each employee has the safest working environment possible. They make sure all the tools are in safe and working condition. All of our scaffolds and ladders are inspected before their use.

Then time is spent to discuss certain topics that our safety team has chosen for that week or to discuss any particular jobsite hazards you may encounter on your job. There is a great effort made by our company and supervisors to make sure you are safe, but there is a certain obligation each one of us has to do. Make sure we keep our self out of harm's way. It is very important that while a safety meeting is conducted you pay very close attention, whether it is presented in English or Spanish.

THIS COULD SAVE YOUR LIFE!! Or keep you from getting seriously hurt. If you have any questions about what's presented ask, if you have noticed any unsafe act or condition bring it up for discussion. Remember **"IT'S YOU"** and those around you who are in harm's way, so don't leave it up to someone else to keep you safe; that's your obligation to your self, your family and your co-worker.
