Ceilings & Acoustical Solutions

Paint, Specialty Coatings & Wallcoverings

Fabric Panels & Stretch Systems

Architect: Johnston Marklee

General Contractor: Gilbane Building Company

The Menil Drawing Institute is composed of a series of buildings and courtyards joined by a white steel roof that hovers over the landscape. MAREK embarked on something new by installing some perforated gypsum ceilings creating a unique design that definitely draws the eye. We completed gypsum, paint and doors and hardware in the Energy House.
